

15. Toxicology and Pharmacology

Preclinical pharmacology and animal model data.

16. Safety Information

General safety profile across all patient cohorts.

Patient population demographics and baseline characteristics.

16.1 Adverse Events

Detailed adverse event analysis spanning multiple observation periods.

Patient monitoring was conducted every two weeks.

16.1.1 Serious Events

Detailed breakdown of serious adverse events across trial arms.

16.1.2 Non-serious Events

Detailed list of non-serious adverse events observed in treatment groups.

16.2 Laboratory Findings

Clinical pathology, urinalysis, and metabolic panels.

17. Clinical Efficacy

Primary and secondary efficacy endpoints.
